Abstract: Our solar system’s cyclic order explains the sudden appearance of the Advanced Sumerians and Pharaohs around the time of the Atlantean and Mayan destruction. Certainly past advanced civilizations do point to the cyclic rise and fall of human cultures extending much farther back into “prehistory” than currently accepted. Ancients believed the universe was concentric heavens, there is evidence of the ancient knowledge of the sun’s processional cycle of almost 26,000 years, leading to the coup of north and south poles. Edmund Halley wrote about the photon belt that periodically encases the Pleiades constellation’s eight suns. Halley proposed planet Earth was composed of five concentric earths. In 1950s Doctors Watson and Crick discovered a third separated strand in the double helix. Now energies from the Photon Belt are recalibrating dormant DNA strands, where originally humanity was endowed with 12 DNA strands. Every culture developed their legend of the perfect Human who emerges at the end of human evolution, these prophecies also met with the Abrahamic religions concerning the end’s signs and the return of paradise on Earth. Christ and the Quran spoke of a light consciousness that succeeds in the earth and the succession of angel like humans before the end.

Key words: Ancient cosmos maps, multilayered heavens, cyclic solar order, axes coupe, photon belt, 12 DNA strands, cosmic consciousness.

1. Ancient Maps of the Heavens

The ancients believed in the multiple layers of the heavens and earth, and likened the world to a giant tree embracing many worlds. To the Greek philosophers the map of the universe was divided into the “heavens” where there lived some aspects of the universe. It was believed that the seven heavens revolve within the outer heavens in regular movement in a clockwise direction at a constant speed. The tenth heaven was the dwelling of God and the elite, and the initial engine that controls the movements of the other heavens. The ninth Heaven was referred to as “spherical crystal, the eighth the Planetarium.” The near seven heavens all rotated in the opposite direction of the outer heavens in a clockwise direction. Earth was considered the center of the universe being composed of four elements: earth, water, air and fire. The sky was one element, ether or essence (the fifth substance). Hell was at the center of the earth (Fig. 1).

Babylonians believed in the seven earths and seven heavens, the lower human world and the upper world, and believed that below our sky and earth existed six skies and six Earth one above another. Ancient Babylonian history documented tablets stressed the multiplicity of earth layers from the bottom of the earth and the underworld. We read in the sixth board of the inscription of the Babylonian creation epic Enuma Elish: “They set up rituals in the majestic Ezagela and laid the foundations of worship and then dispersed among them the heavens and earths.” (Fig 2) [1].

The Pharaohs also believed in the seven heavens, seven earths, and the lower human world. They had knowledge of the six earths inside the earth and believed that the lower world had a guard, Anubis, a man who has a wolf head. And that the lower world had courts with forty-two judges. The king of the underworld is Osiris [2].

Doctor Edmund Halley also demonstrated through his study on the atmosphere and the Earth’s magnetic
field and gravity, that planet Earth is composed of five earths inside each other, affecting the atmosphere of our outer planet. They are like concentric globes, globe smaller than a globe all of which are inside planet Earth, each layer has its own atmosphere. Halley said in a speech before members of the British Royal Society in London that the earth is hollow and all the celestial bodies have hollow cavities like the sports ball. That planet Earth has a thick crust of approximately 400 miles or less, and then a hollow Earth with another smaller earth, such as the Chinese puzzle box (box inside a box) to five layers of the planet in each other. The most surprising of the Proposal is that each of those balls or planets which are inside our earth may contain life within. Halley also proposed that likely there were small illuminating stars inside the earth that light that unknown world. “Charting the Heavens and the Seas”, Dr. Halley [3] presented his theory to the Royal Society in 1692.

For the Mayan culture, the cosmos consisted of cosmic poles omitting energies from the heart of the cosmic tree that accompanied by the evolution of consciousness in a hierarchical nine degrees that constitute a record of the development of awareness since the beginning of time. For each of these degrees of their own frequency, they print an example of awareness on human beings. These energies condense with each layer twenty times and they accelerate in decreasing in lengths according to an accurate chronological order. While deep in the bottom began a wave of evolution that stretched for 16 billion years, the ninth and final wave’s length is of 234 days. And the last wave will move our understanding of the world returning us to unity awareness and commitment to the cosmic plan; recognizing the highest significance of our lives and what was behind the process of evolution. It should be noted here that the Mayan civilization had knowledge of the cycles of our solar system, and left a warning of a certain alignment in the dome of the sky that brings with it massive destruction to the Earth [4]; Their texts left us a warning that the earth and the sun will line up in a straight line with the heart of the galaxy at the end of the cycle, and that we will be able to see the heart of the galaxy through the Split in the dark that will open for three days. According to their sacred texts, the dark rift that opens during the solar alignment with the center of the galaxy is an entrance to hell, a headquarters of evil. But this alignment which was repeated approximately every 26,000 years with what resembles the earth’s cyclic dooms hour, this time will coincide with the completion of the Cosmic plan of creation and the coming together of the layers of the universe.
In the Quran the universe is a horn or trumpet containing seven heavens and of the earth like them, Fig. 3, they are worlds in degrees of light, all spinning with our physical world around a central axis. Trumpet Universe [4] and to our Earth there is a strange centrality, not in the solar system or in the Milky Way or the visual material universe, but as a gateway to an etheric world in the higher heavens and bottom worlds of lesser light. “Allah Who created seven skies and of the earth like them He descends the order between them so that you know that Allah is well capable of everything and that Allah has encompassed everything in knowledge”. Quran, Chapter 65, Verse 12. “To Him belong what is in the heavens and what is in the earth and what is between them and what is beneath the soil.” Quran, Chapter 20, Verse 6.

2. Earth History

There is no doubt that the human race is ancient in the Earth, Anthropologists admit that the last Adam appeared before 450 thousand years after a far less developed chain. Only recently the depth of the earth's history is being revealed, that periodic destruction repeated re-creation (Noah’s Ark) many times. There are records of disappearing civilizations in mass destruction and the rise and fall of continents. There is no doubt that the previous civilizations reached stages of development that may surpass what we have become today. In the records of the Pharaohs there are pictures of flying saucers, a proof that ancient civilizations communicated with others in the universe (Fig. 4).

The Sumerian civilization appeared suddenly as a civilization of gods, as scientists are not able to justify its sudden rise and great development. It could have been part of a sophisticated civilization on Earth while destruction erased other continents. It should be noted that the history of Sumerian stone tablets goes back to the same time as the Mayan civilization’s last destruction, around (6,000 years), this also explains the appearance of the Pharaohs among the Egyptians after the sinking of Atlantis of superior evolution. The Atlantis Dialogue, Plato [5].

In his “Maps of the Ancient Sea Kings” Prof. Charles H. Hapgood [6] provides pointers to the existence of a former civilization of high technological achievement and considerable intellectual development, called by some “Atlantis”. The Mayans reported that an alien race (whom they called “gods”) came from over the seas and taught them symbolic writing and how to build pyramids. Some modern researchers speculate that these were the Egyptians. It is possible, however, that the Egyptians and ancient Americans shared a common heritage, and that in the Western Hemisphere there are remains of colonies established as parts of a global empire or by survivors of disasters that destroyed the motherland. There is also extensive research of Sunken Atlantis in “Atlantis the Lost Continent Finally Found” [8].

The oldest clay tablets found in Iraq, date back to six thousand years, their Sumerian language was used
by Acadians, and after them the Assyrians and Babylonians in the second half of the second millennium BC. Those Sumerian tablets mention the story of the flood as they speak of the earth’s rotation around the sun and the biblical story of creation. They link the floods to the solar cycle, which the Pharaohs and Mayans warned brings destruction at the end of a cycle of the sun (the myth of the Flood) and the repetition of the Hour (as a sand hour glass) and the re-creation of the (Biblical story of creation). In the geological records of the Earth there are continents that sank and ice ages in successive eras. Certainly, advanced civilizations in the distant past do point to the cyclic rise and fall of human cultures and races extending much further back into “prehistory” than currently accepted. Archeological records do pose serious questions for biblical creation history.

3. The Pyramids Orientation

The pyramids of Egypt and Central America point to the deep knowledge of the pharaohs and Mayans of the cyclic order of time, their messages left a warning of the periodic visiting destruction. And with other archeological sites in different parts of the world, they pointed to the critical importance of an astronomical alignment in the heavens that occurred around 10,500 years ago. In the “The Orion Mystery” and “The Message of The Sphynx” [9] the authors explore the placement of the pyramids in relation to the main stars in the "belt" of Orion (Fig. 5). They cite evidence suggesting that the Great Pyramid may have been planned about 10,500 BC, even if built or completed later (c. 2450 BC), because the alignments are exactly calculated for the time when the constellation Leo rose at the vernal equinox, ushering in the “Age of Leo”. The celestial configuration at sunrise on the spring equinox about 10,500 BC is reflected in the Giza pyramids and the Sphinx. Osiris (the constellation Orion) reaches his southernmost point—and closest proximity to earth—marking the beginning of the 26,000 year precessional cycle. The arrangement of the three pyramids mirrors Orion’s belt of three stars, which lie directly on the north-south meridian. The constellation Leo rises in the east, where the Sphinx watches, marking the 2,160 year Age of Leo. “The Message of the Sphinx” [10]Linked with the Egyptian evidence is a newly understood heritage of the proto-Mayan people of Central America. Both civilizations recorded events affecting Earth's peoples long ago when certain solar, planetary, and stellar interactions had a drastic effect upon our planet. “The Maya Prophecies: Unlocking the Secrets of a Lost Civilization” cites these prophecies and their relation to shifting continents, climatic changes, and disasters (including earthquakes, etc.)—all involving declining sunspot activity and changes in Earth's protective “veil” or Van Allen Belt. The authors discuss the mysterious origins of the Mayan people, and their concept of time. Interpreting the time frame of these events in Mayan and pharaohs records gives a chronological reckoning of the period beginning around 11,000 BC as a significant date. The authors particularly discuss how the rise and fall of world ages and civilizations seem to coincide with the sunspot cycle, maintaining that reduced sunspot activity coincided with a decline in Mayan fertility and the sudden end of their civilization. The Maya Prophecies: Unlocking the Secrets of a Lost Civilization [11]. The evidence in these volumes
includes recognition of the ancient knowledge of the sun’s precessional cycle when its rising at the spring equinox occurs in a new place within the zodiacal “houses”, needing almost 26,000 years to complete the cycle.

The Quran mentions infertility as a sign of the hour “And when the pregnant are disrupted”. Quran, Chapter 81, Verse 4. The Earth is passing now through changes with acceleration in time, and with the sum of recent and ancient information, a new vision emerges of the (Hour) like an hourglass, that occurs in cycles until the last (Day of Resurrection).

In the history of the Earth are records of sinking continents and the rise of others that coincided with cycles of destruction. “How many generations have We destroyed after Noah? and your Lord is sufficient to note and see the sins of His servants.” Quran, Chapter 17, Verse 17.

The pharaohs and Mayan ruins point to the importance of an astronomical alignment which happened in the dome of the sky 11,000 years ago, and the knowledge of these civilizations of the cyclic order of time. “I swear not by the position of the stars, and that is indeed a mighty adjuration if you but know” Quran, Chapter 56, Verses 75-76.

In the long Mayan calendar count where they predicted events for 26,000 years, there are five cycles of 5,125 years each, four have already passed and all ended in destruction. There are records of the Mayan civilization existence in 3,114 BC, at the beginning of this cycle. According to their sacred texts the dark rift that opens in the centre of the Milky Way at the end of a cycle, is an entrance to the underworld and a haven of evil. “Allah Who created the skies and the earth and what in between them in six days then He descended on the Throne, you have no Guardian or Intercessor other than Him will you not remember”. “He manages the order from the sky to the earth then it ascends to Him in a day that is equal to one thousand years of your reckoning”. “That is the Knowledgeable of the unseen and the seen the Almighty the Compassionate.”. Quran, Chapter 32, Verses 4-6. “Yet they ask you to hasten on Punishment, but Allah will not fail in His Promise. Verily a Day at your Lord is like a thousand years of your reckoning”. Quran, Chapter 22, Verse 47. Looks like every almost six thousand years on earth, the story of creation is repeated in an equivalent of six of God’s days.

4. The Cyclic Order of the Solar System

Our sun is one of eight suns orbiting the central sun Alcyone which is the brightest star in the sky, all are within the Pleiades constellation within a larger cycle in the galaxy. When our Solar system completes a 26,000 year cycle, it would have spent 2,200 years in each of the twelve constellations of the zodiac. The cyclic order of the solar system was revealed by leading research dating back to two centuries ago by few scientists and astronomers, one of them is Serbian astronomer Milutin Milankovitch, who in the nineteenth century introduced contributions to the interpretation of climatic changes on Earth, resulting from the position of the Earth to the sun on the long term, now known as the Milankovitch cycles, Canon of Isolation and the Ice-Age Problem [11] he was the first to clear the relationship of these changes with the ice Ages that have occurred in the geological past of the Earth, as well as climatic changes on Earth that can be expected in the future. He also revealed that our solar system is exposed to periodic fluctuations while moving at the edge of the Milky Way above and below the horizontal plane of the galaxy passing through the horizontal field of gravity of the black hole (or axis) in the center of the galaxy, which is stronger than above and below (Fig. 6). The passage of the solar system through this area leads to disturbances in the gravity of the solar system and the phenomenon of coup of the north and south poles, and this has happened repeatedly in the history of the earth.

The earth takes around 26,000 years to change its orientation towards the heart of the galaxy, causing a shift in the Earth’s poles. And the Pleiades constellation
Astronomy and Messages from Ancient Times

Fig. 6 The cyclic order of our solar system as we move through the Milky Way is precisely how ancient civilizations such as the Mayans based their calendar systems.

also has its cycle in the Milky Way galaxy. A full cycle around the centre of the Milky Way takes 225 million Earth years. There are two verses in the Quran linking succession of the east and west, with changing the people of the earth. “And the sun runs to its settling point. That is the determination of the Exalted in Might, the Knowing). Quran, Chapter 36, Verse 38. “I do not swear by the Lord of risings and settings that We are able - To replace them with better than them; and We are not to be outdone.” Quran, Chapter 70, Verses 40-41. And the Prophet said that the sun goes until it prostrates under the throne, asks permission and is permitted, and is about to prostrate but is not permitted, and asks permission but is not allowed, it is said to her: Return to where you came from, so it rises from the west, that is Allah’s saying: And the sun runs to its settling point That is the determination of the Exalted in Might, the Knowing. Sahih Bukhari [12]

5. The Photon Belt

Within information about the solar system in the Pleiades constellation, are studies on the photon belt. Of these are earlier studies by Sir Edmund Halley who had pioneering studies in exploring the sky and the solar system, he spoke about the photon belt, which goes beyond the Milky Way and comes to encase the larger solar system consisting of eight suns in the Pleiades constellation twice every 26,000 years. This 26,000 years cycle is divided into two periods of darkness, each of which is 11,000 years and separated by two phases of 2,000 year of full light, which represents the stage of entering into the photon belt (Fig. 7).

We are witnessing an end of a solar cycle and great cycles of time. The photon band is one of the integral elements awakening humanity and raising our vibrational frequencies. Great waves of divine energy are being transmitted to Earth preparing us for the moment where life experiences a leap to the higher dimensions with its accompanying state of cosmic consciousness. Our light bodies are being activated now as the new energies from the Photon Belt begin to recalibrate our dormant DNA strands. Each of the 12 DNA strands represents one of the 12 aspects of our multi-dimensional consciousness. These contain the blueprint of ourselves from before the “descent” as divine fully conscious beings. Russian researchers joined linguists and geneticists in a venture to explore the DNA. According to their findings, our DNA is a biological Internet that serves as data for storage and communication. They found that the alkaline of our DNA follow a regular grammar and do have a set of rules just like our languages. Since the basic structure

Fig. 7 Every 11,000 years, Our solar system passes through a 2,000 year-wide belt of highly charged ion particles known as the photon belt.
of DNA-alkaline pairs and of language is of the same structure, one can simply use words and sentences of the human language to affect the structure of the DNA! This was experimentally proven. Human languages did not appear coincidentally but are a reflection of our inherent DNA. Living DNA substance (in living tissue, not in vitro) will always react to language-modulated laser rays and even to radio waves, if the proper frequencies (sound) are being used. This scientifically explains why affirmations, hypnosis and the like can have such strong effects on humans and their bodies. It is entirely normal and natural for our DNA to react to language. Esoteric and spiritual teachers have known for ages that our body is programmable by language, words and thought.

In the early 1950s Doctors Watson and Crick make an epic discovery concerning the RNA/DNA double helix. They found a third, separated strand in the center of the double helix. The Double Helix: A Personal Account of the Discovery of the Structure of DNA [13]. At the first, many geneticists postulated that this third strand is just protein detritus, a material left over from the more primitive evolutionary elements that originally created the human species. Nonetheless, by the mid-1980s, researchers determined that the third strand was starting to connect to the four ladders inside the double helix. This activating third strand displayed highly unusual properties. Its unexpected development called into question how human evolution had occurred.

During the 1995 Conference on Genetics in Mexico City, scientists debated whether to conceal this odd problem from the public or to give out false information, pending the completion of further studies. Many geneticists saw this phenomenon as the potential beginning of a new global catastrophe, now much more widespread in secret. They failed to see it as a portent of the ever-evolving integration of body, mind, and Spirit. The early 1990s saw the arrival of infants born with activated third and more strands, these infants demonstrated very high intelligence and expanded psychic abilities. And a number of adults began to appear, globally, whose third strand is in the preliminary stages of reconnecting to the four ladders of the RNA/DNA double helix. Recent information has revealed the higher purpose of this sudden reactivation of our 10 strands of DNA; supporting a multidimensional consciousness. When we are multidimensional our physic abilities are reawakened and we have developed a second neural network at the etheric level. This second neural network is what allows us to live in multiple dimensions at once, as Adam was before the fall in consciousness. The Quran brought the news of a light consciousness that succeeds in the earth with Christ’s return, or the succession of angel like humans before the hour. “He is but a servant on whom we bestowed our favor, and we made him an example to the children of Israel. And had we pleased, we could make angels from amongst you to be successors in the land. And most surely it is knowledge of the hour, therefore have no doubt about it and follow me: this is the right path” Quran, Chapter 43, Verses 59-61.

6. Conclusion

Throughout time every culture developed its own legend of a perfected God Human who will emerge at the end of human evolution, which is the end towards unification of body, mind and soul, an exalted state of awareness and living in a state of divine connectedness. These prophecies in many of their details, met with the Abrahamic religions concerning the signs of the end and the return of Earth paradise. The Mayan inscriptions that describe the meaning of the end of the calendar, in his book The Mayan calendar and the transformation of cosmic consciousness, Dr. Carl Calleman says that at this stage of time the nine foundation entity will descend, will appear in his full glory, which means that the nine cosmic forces are going to manifest together fully. The end of the calendar is about the completion of the process of evolution, which was going on since the
Astronomy and Messages from Ancient Times

beginning of time and led the world to what it is today. [14]. The Hopi spoke of the rise of the fifth peace world, and one of the contemporary Hopi leaders said lately: “We are the ones we were waiting for”. And in the Quran “… As He started you, you shall return …”. Quran, Chapter 7, Verse 29. “... the day that Allah will not abase the Prophet and those who believed with him; their light shall run on before them and by their right hands; they shall say: Our Lord, complete for us our light, and forgive us, surely You have power over all things” Quran, Chapter 66, Verse 8.
