Dr. Mario Terzo was born on 28.04.1979 in Naples (Italy). He is a postdoctoral researcher in dynamics and control of mechanical systems at the University of Naples Federico II. He obtained his M.Sc. degree in Mechanical Engineering in 2004 with lode and the Ph.D. in Mechanical System Engineering in 2008, both from the University of Naples Federico II. He is a reviewer for the following international journals: Mechanical System and Signal Processing; Procedia Engineering; Smart Materials and Structures; Measurement Science and Technology. He was Co-Chairman of the ASME Congress ESDA 2012 – Control of Actuators.

### 2. International Conference Proceedings with International Boards and Reviewers from 2007

4) G. Di Massa, R. Russo and M. Terzo, A nonlinear dynamic model of a magnetorheological fluid brake and evaluation of the influence of temperature and speed on its parameters. *The 2011 International Conference on Smart Structures and Systems (within ASEM11)*, Proc. of
the 2011 World Congress on Advances in Structural Engineering and Mechanics, Seoul, Korea, September, 2011, pp. 1802 – 1815.

13) Flavio FARRONI, Michele RUSSO, Riccardo RUSSO, Mario TERZO, Francesco TIMPONE, INFLUENCE OF TYRE AND VEHICLE CONSTRUCTIVE
CHARACTERISTICS ON LINEAR STABILITY OF A FOUR WHEEL VEHICLE MODEL.
